

# Onboarding Made Easy

## MigrationWiz® Mailbox Migration & DeploymentPro™ Bundle Earn Greater Margins and Offer a Better Customer Experience

Migrating mail to Office 365 doesn't end when your customers' mailboxes get to the cloud. The final step is Outlook configuration. That's why we've bundled BitTitan MigrationWiz with DeploymentPro. This bundle combines the power of MigrationWiz mailbox migration with DeploymentPro to configure Outlook for all your customers' end users. You can increase profits for mailbox migration projects while providing end-to-end services for your customers.

### Better Together: The MigrationWiz & DeploymentPro Bundle

#### MigrationWiz

Moving to the cloud shouldn't put your customer's business on hold.

User downtime is still among the biggest challenges of cloud migration. MigrationWiz moves mailbox data quickly and seamlessly, with zero user downtime. MigrationWiz scales to handle projects of any size and empowers you to initiate your migrations from anywhere—without taking your email systems offline.

Mailbox Migration combined with DeploymentPro lets you provide a better experience for your customers, while you increase margins on the project.

#### MigrationWiz

- Migrate from any of our global data centers
- Do it in your own time with no time limit on migration
- Set the ideal migration scenario with advanced migration filtering by date, folders and more
- Access by browser, PowerShell or API

#### DeploymentPro

Eliminate the need to visit every desktop and device—no experience or training required.

Following a mailbox migration, end users often generate a flood of support tickets when they try to configure Outlook. DeploymentPro lets you take care of configuration remotely and helps you increase your margin for the project. With DeploymentPro, you can manage all desktops directly from your web browser.

#### DeploymentPro

- Choose from several easy ways to deploy the desktop agent
- Check health of hardware and software remotely
- Create Microsoft Outlook profiles for Office 365
- Configure and track desktops remotely from a web interface
- Customize end-user communications
