

Personal Archive Migration

Eliminate the cost and complexity of managing PSTs once and for all. Easily discover, collect and migrate personal archives to Office 365, Exchange 2013, Google, Amazon and just about any other storage destination.

For years, organizations everywhere have viewed Exchange PST files as a necessary evil. They represent a highly portable and non-audited method for moving critical data in and out of an organization. On top of their high storage costs and unintended security risks, PSTs leave organizations highly exposed to legal liability because they cannot be reliably audited, recovered, or managed.

Why automate a personal archive migration with MSPComplete®?

As the industry leader in cloud enablement, BitTitan offers a fast, wizard-based migration process through the MSPComplete platform. You'll automatically discover, collect and migrate PSTs, including capturing owners and metadata. Migrate up to 5 terabytes per day, even optimize performance by enabling optional multithreaded uploading from the end-user desktop. Then, easily disable PSTs on the network after the workload is moved.

Satisfy your customers with secure, centralized personal archive storage—without disruptions during the migration. Legal will have no trouble with future eDiscovery requests and IT will be thrilled by reduced IP leakage and security risk.

DISCOVER

Easily find all of the PSTs on your network—whether they're on desktops or file shares.

COLLECT

Collect personal archives, automatically assign identities, and filter out any data you don't want.

MIGRATE

Through MSPComplete, watch the PSTs fly in to your selected migration destination!

ADDITIONAL FEATURES AND BENEFITS

- Support for hundreds of file types
- Dozens of available migration destinations
- No software/widget installation required
- Advanced filtering capabilities
- Easy-to-use, intuitive UI
- Comprehensive chain of custody logging
- Automatically assigns PST identities
- Automatically bypasses passwords
- Migrate at speeds of up to 5 terabytes per day
- Scalable
- Dynamically creates many simultaneous connections during migration
- 24/7/365 technical support 100% delivered from the cloud
- Zero customer downtime
- Secure and compliant
