

SharePoint Migrations

Increase profits with an additional workload round collaboration.

SharePoint Migrations Simplified

For most migrations to the cloud, documents and collaboration files are often an afterthought, once the mailboxes have been moved. In addition, moving SharePoint files, lists and permissions can be difficult and time consuming due to ensuring file structures and permissions align with the new file system. BitTitan MSPComplete® eliminates the complexities within a SharePoint migration.

*Coming soon

MSPComplete gives you the best migration experience on every project, and allows you to migrate mailboxes, documents and collaboration files together, from one source to another, without requiring any additional applications or services.

100% cloud based—
no applications to install

No specialized training—
email administrator can run
all of your migration

Secure data transfer—
data is encrypted at all times

Automated migration of files from
source to destination

Intelligent filtering—migrate
only the documents you need

Keep existing file hierarchies and
permissions, where supported

No upgrade path required—
move directly to the new system

Free 24/7 online support

With MSPComplete, you can easily add additional workloads to your project portfolio and move beyond traditional mailbox migrations. We take the heavy lifting out of document migrations, enabling you to enhance customer projects, build relationships and solve customer problems while saving time, money, and resources.

MSPComplete allows you to perform automated migrations from any source to any destination. All migrations are performed directly from your web browser through a single, common user interface, enabling you to easily add more workloads to your project portfolio and increase your project revenue.
